Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • "I don't know how to start conversations with professionals." • "I wish I had personalized conversation starters." • "Finding relevant networking events takes too much time."	THINKS • "Will I make a good first impression?" • "What topics should I discuss at networking events?" • "Can AI help me build better professional connections?"
PERSONAL NAME <i>Rahul Sharma</i> <i>(Final-Year Engineering Student / Job Seeker)</i>	
DOES • Attends career fairs and networking events. • Searches LinkedIn and event websites for opportunities • Takes notes about contacts after events.	FEELS • Nervous before meeting new people. • Confident when conversations go smoothly. • Frustrated when conversations become awkward.
